Nuevo proyecto

Programación en Python

Tijuana B.C. a 9 de octubre de 2018

# Proyecto Nuevo

Para crear un nuevo proyecto empezamos entrando a la terminal, una vez dentro, activamos nuestro entorno virtual y una vez dentro utilizamos el siguiente código:

```
(skynet) john@john-Latitude-E6540:~$ django-admin.py startproject KamiTweet
```

Posteriormente comprobamos que el nuevo proyecto fue creado exitosamente, para ello utilizamos el comando **tree** para, no sin antes importarlo en caso de que

no  
este  
instal  
ado.

Para  
finaliz  
ar  
corre  
mos

```
(skynet) john@john-Latitude-E6540:~$ tree KamiTweet/  
KamiTweet/  
├── KamiTweet  
│   ├── __init__.py  
│   ├── settings.py  
│   ├── urls.py  
│   └── wsgi.py  
└── manage.py  
  
1 directory, 5 files
```

el proyecto para comprobar que todo funciones correctamente, para ello utilizamos el comando **python manage.py runserver** y una vez que corremos el proyecto entramos a el por medio de un navegador

```
(skynet) john@john-Latitude-E6540:~/KamiTweet$ python manage.py runserver  
Performing system checks...  
  
System check identified no issues (0 silenced).  
  
You have 15 unapplied migration(s). Your project may not work properly until you apply the migrations for app(s): admin, auth, contenttypes, sessions.  
Run 'python manage.py migrate' to apply them.  
  
September 12, 2018 - 20:41:23  
Django version 2.1, using settings 'KamiTweet.settings'
